Attention all HLC Parents,

Maryland State Department of Education implements a State regulation for all children in regulated care and early childhood educational programs to administer a developmental checklist screening tool. Heritage Learning Center will implement the Ages and Stages Questionnaire. Your child's classroom teacher as well as parents will complete the tool. All children up to kindergarten entry attending regulated care and early childhood educational programs will need to have a developmental screening conducted. Developmental screening is used to celebrate a child's achievement as well as refer them for support and services when there is an area of concern. Developmental screenings, along with regular physical exams, hearing tests and vision tests, are important ways to monitor a child's growth and development. A child's development can be measured by how a child learns, speaks, moves, behaves and relates. Skills such as smiling, waving, and talking are developmental milestones. Results from developmental screenings indicate which children would benefit from a full evaluation and assessment. Children who receive early intervention services generally do better in the long term than those identified later. Upon completion of the screening, we will meet with you to discuss the findings and whether a referral to another agency for further evaluation is necessary.

Children aged birth-36 months will be required to have two screenings per year. Children ages 37 months-kindergarten entry will be required to have one screening per year. Parents should consider this process as part of required documentation in order for the child to attend our or any other licensed child care program in the State. The screening tool our program will use is called Ages and Stages Questionnaire 3. Our screening process will begin September 21 - 22, 2020. Parents will be responsible for completing a portion of the screening tool at home and return to their child's classroom teacher. Parents screening tools will be distributed September 16, 2019 and must be returned to their child's teachers by September 14, 2020. All classroom screenings will be completed throughout that day. Classrooms will follow screening schedules.

Please contact Anithia or Aaron should you have any questions. Thank you.
