

PHOTO PERMISSION SLIP

Classrooms like to display pictures of the children in our center. It is a nice way for the children to develop self-awareness, self-actualization, and self-concept. It is also nice for the other children in the class to learn the faces of their new friends. These can be pictures brought in from home, or they may be ones taken here at the center.

We also like to display family pictures. Those we would like each family to provide. These are nice for children that have separation problems. It is also a way for both our new friends and teachers to learn about each other's families.

Please check one:

_____ I give permission for the center to both take and display pictures of my child and our family.

_____ I give permission for the center to only display pictures that I bring in. They may not take any themselves.

_____ I do not give permission for the center to take or display pictures of my child or our family.
